WBCSD’s Forest Solutions Group (FSG) is the global platform where leading business in the forest products sector build and share solutions to sustainable development. FSG’s mission is to grow an inclusive circular bioeconomy that is rooted in thriving working forests. As a sign of shared commitment, members of FSG adhere to Membership Principles & Responsibilities, and report annually on a set of Key Performance Indicators to track progress on the commitments made in the Forest Sector SDG Roadmap.

This document provides an overview of the 2022 KPI results (based on 2021 data), as well as trends conveyed through Compound Annual Growth Rate (CAGR) when available.

Status: August 2022

**Working Forests**

WE ARE COMMITTED TO BRINGING MORE OF THE WORLD’S WORKING FOREST UNDER SUSTAINABLE MANAGEMENT

To promote sustainable forest management practices that are inclusive, and contribute to nature recovery and climate change mitigation, in 2021:

- 98% of the 20 million hectares of forests that FSG members directly manage were certified by an independent third party (CAGR 2014–2021: 1%)
- FSG members reached a total of 59,000 smallholders directly through programs designed to support the adoption of sustainable forestry practices or manufacturing, and/or building capacity to obtain and retain certification
- In addition to the conservation measures in their productive forests, FSG members have set aside on average 24% of their land primarily for nature conservation or restoration purposes, representing an area of 4.8 million hectares
- To promote impact at scale they also contributed to the conservation and restoration of around 725,000 hectares of land beyond the boundaries of their own landholdings to promote impact at scale.

**Bioeconomy**

WE ARE COMMITTED TO SCALING UP THE SECTOR’S CONTRIBUTIONS TO A CIRCULAR BIOECONOMY

To bring to market low-carbon and circular wood fiber products, in 2021:

- On average, FSG members invested 0.35% of total revenues into R&D to bring to market innovative wood fiber products that substitute for less sustainable alternatives.
**Circularity**

*WE ARE COMMITTED TO BRINGING RESOURCE-EFFICIENT, BIO-BASED AND CIRCULAR BUSINESS MODELS TO SCALE*

To drive circularity at every stage of the forest products value chain, in 2021:

- On average, FSG members reused 76% of their process residuals and waste generated either as raw material input in their own value chain or as a feedstock for other industries.
- On average, 26% of the total fiber used in FSG member’s paper & board production was recycled fiber.
- 75% of FSG members systematically apply circular design principles or guidance to maximize products recovery potential.
- 89% of FSG members are actively contributing to improving the recovery rate of wood fiber products by collaborating with actors in their value chain, and with local or regional authorities.

**Climate**

*WE ARE COMMITTED TO ADVANCING AND STRENGTHENING THE ROLE OF FORESTS, WOOD FIBER PRODUCTS AND THE FOREST SECTOR IN GLOBAL CLIMATE CHANGE MITIGATION AND ADAPTION*

To drive emissions reductions and improved resource efficiency across the full value chain, in 2021:

- 93% of FSG members have set time-bound and verified CO₂ reduction targets using the GHG Protocol and aligned with climate science.
- FSG members consumed on average 33,103 GWh of energy, of which 67% came from renewable sources mostly through the use of woody biomass derived from harvesting, processing and manufacturing wood fiber (CAGR 2014–2021: 1%).
- FSG members reported an average GHG emission intensity of 0.35 mt CO₂eq per ton of saleable product.
- 50% of FSG members have included Scope 3 emissions in their reductions target.

To strengthen the role of working forests in climate change mitigation and adaptation, in 2021:

- FSG members planted a total of approximately 407 million trees to supplement naturally regenerating forests, regrow forests harvested for their wood supply, or for restoration activities.
- In order to do so, they grew a total of around 449 million seedlings in their nurseries.
- On average, 35% of total seedlings grown were sold or donated to local communities, suppliers, NGOs and other regional partners.

**Water**

*WE ARE COMMITTED TO EXPANDING CONTEXT-BASED WATER STEWARDSHIP APPROACHES*

To drive water stewardship in their manufacturing operations, in 2021:

- FSG members withdrew 38.4m³ of water per ton of saleable production, of which 92.6% was returned to water sources, suppliers or third parties for reuse (CAGR 2014–2021: 0%).
- As a measure of water quality, FSG members reported an average of 6.1 kg Chemical Oxygen Demand (COD) per ton of saleable production (CAGR 2014–2021: -2%).
- On average, 6.5% of total water consumption took place in high water stress regions. 96.4% of FSG members’ manufacturing operations in these regions have water consumption reduction plans in place.
## People

**WE ARE COMMITTED TO ENHANCING THE SECTOR’S ATTRACTIVENESS, DIVERSITY, INCLUSIVENESS AND SAFETY**

To attract and retain talent, and enhance workforce diversity, in 2021:
- **64%** of FSG members reported having a numerical, time-bound target on increasing inclusion and diversity

- Of the **26%** average share of female employees, **28%** were in senior management positions (CAGR 2016–2021: 7%).

To drive progress on health & safety in the sector, in 2021:
- **FSG members provided an average of 21 training hours per employee.**
- **FSG members reported an average Total Recordable Incident Rate (TRIR) of 0.7 per 100 full time employees.**

## Communities

**WE ARE COMMITTED TO ENHANCING THE LIVELIHOODS AND SUPPORTING THE RESILIENCE OF FOREST-DEPENDENT COMMUNITIES AND LOCAL ECONOMIES**

To enhance livelihoods and support the resilience of forest-dependant communities, in 2021:
- **FSG members invested an average of 14 million USD in community initiatives**

- **88%** of FSG members included a provision on minimum wage in their supplier code of conduct

- **93%** of FSG members had a remedy in place for workers found to have been subjected to human rights abuses.

## Procurement

**WE ARE COMMITTED TO STRENGTHENING AND ENHANCING RESPONSIBLE PROCUREMENT PRACTICES, TRANSPARENCY AND TRACEABILITY THROUGHOUT THE VALUE CHAIN**

To uphold and enhance responsible procurement practices, in 2021:
- **FSG members evaluated on average 77% of their suppliers for compliance based on a code of conduct (CAGR 2016–2021: 4%).**

To ensure transparency and traceability throughout the value chain, in 2021:
- **On average, 63% of the total volume of wood fiber product intake from FSG members was certified by an externally recognized certification scheme (CAGR 2014–2021: 0%).**

- **100% of the total volume of non-certified wood fiber products was covered by due diligence and traceability systems.**
